

Q. Apply Principal Component Analysis (PCA) on the Wine dataset to reduce dimensionality and visualize the data. Analyze the proportion of variance explained and interpret the 2D and 3D projections.

Ans:

Explained variance ratio: [0.36198848 0.1920749 0.11123631 0.0706903 0.06563294 0.04935823 0.04238679 0.02680749 0.02222153 0.01930019 0.01736836 0.01298233 0.00795215]
